PROFILE:

Web developer with experience building modern, responsive applications using React, Next.js, Angular, TypeScript, JavaScript, HTML, and CSS through academic and client projects. Skilled in creating reusable UI components, integrating and developing REST APIs, and working across the stack with .NET, SQL Server, and Entity Framework Core. Currently seeking a LIA internship or junior developer opportunity where I can contribute, collaborate, and continue growing as a developer.

EXPERIENCE:

Student

Future Games

08/2025 – Present

📍 Stockholm, Sweden

- Built multiple responsive web applications using React, Next.js, and TypeScript, developing dynamic, scalable user interfaces with reusable components.
- Built an e-commerce application (Val) using Next.js and TypeScript, fetching product data from an external API and managing state with the Context API.
- Collaborated with teams following Agile methodology, participating in sprints and delivering demos during group projects.
- Styled applications using Tailwind CSS, Bootstrap, and Material UI (MUI).
- Wrote unit and integration tests using Jest and React Testing Library, and integrated frontend with backend APIs for dynamic data rendering.
- Built and deployed applications to Vercel, using Git and GitHub for version control and collaboration.

Recent Personal Project

BookVault – Full-Stack Web Application

09/2026

<https://brave-stone-058ce9710.5.azurestaticapps.net>

- Built a full-stack CRUD application using Angular, .NET, and SQL Server with Entity Framework Core, implementing JWT-based authentication and Bootstrap for styling.
- Learned the entire stack from scratch through self-study and hands-on building; deployed the application on Azure.
